# SUMMER 2024

OPS PROGRAM DATA OVERVIEW

OBJECTIVE

- To provide the WRAP Participants with an overview of the WRAP Operations Program, focusing on:

  - Participation
  - File and data integrity

- **Data Coverage:** 2024 Summer season

- **Time Frame:** June 1st to September 15th

- **Focus:** Daily participation in the Program

DEFICITS & SURPLUS

SPP

DEFICIT AND SURPLUS INTERVALS

- The following chart counts the number of times a participant was either surplus or deficit for a given hour

  - For example, if 20 participants are surplus for a given hour on a day, then this would increase the count by 20

- There were deficit intervals throughout the season but most of the occurrences showed up during July and August

- The surplus intervals were fairly consistent throughout the season

Count of Deficit and Surplus Intervals

FILE UPLOADS

SPP
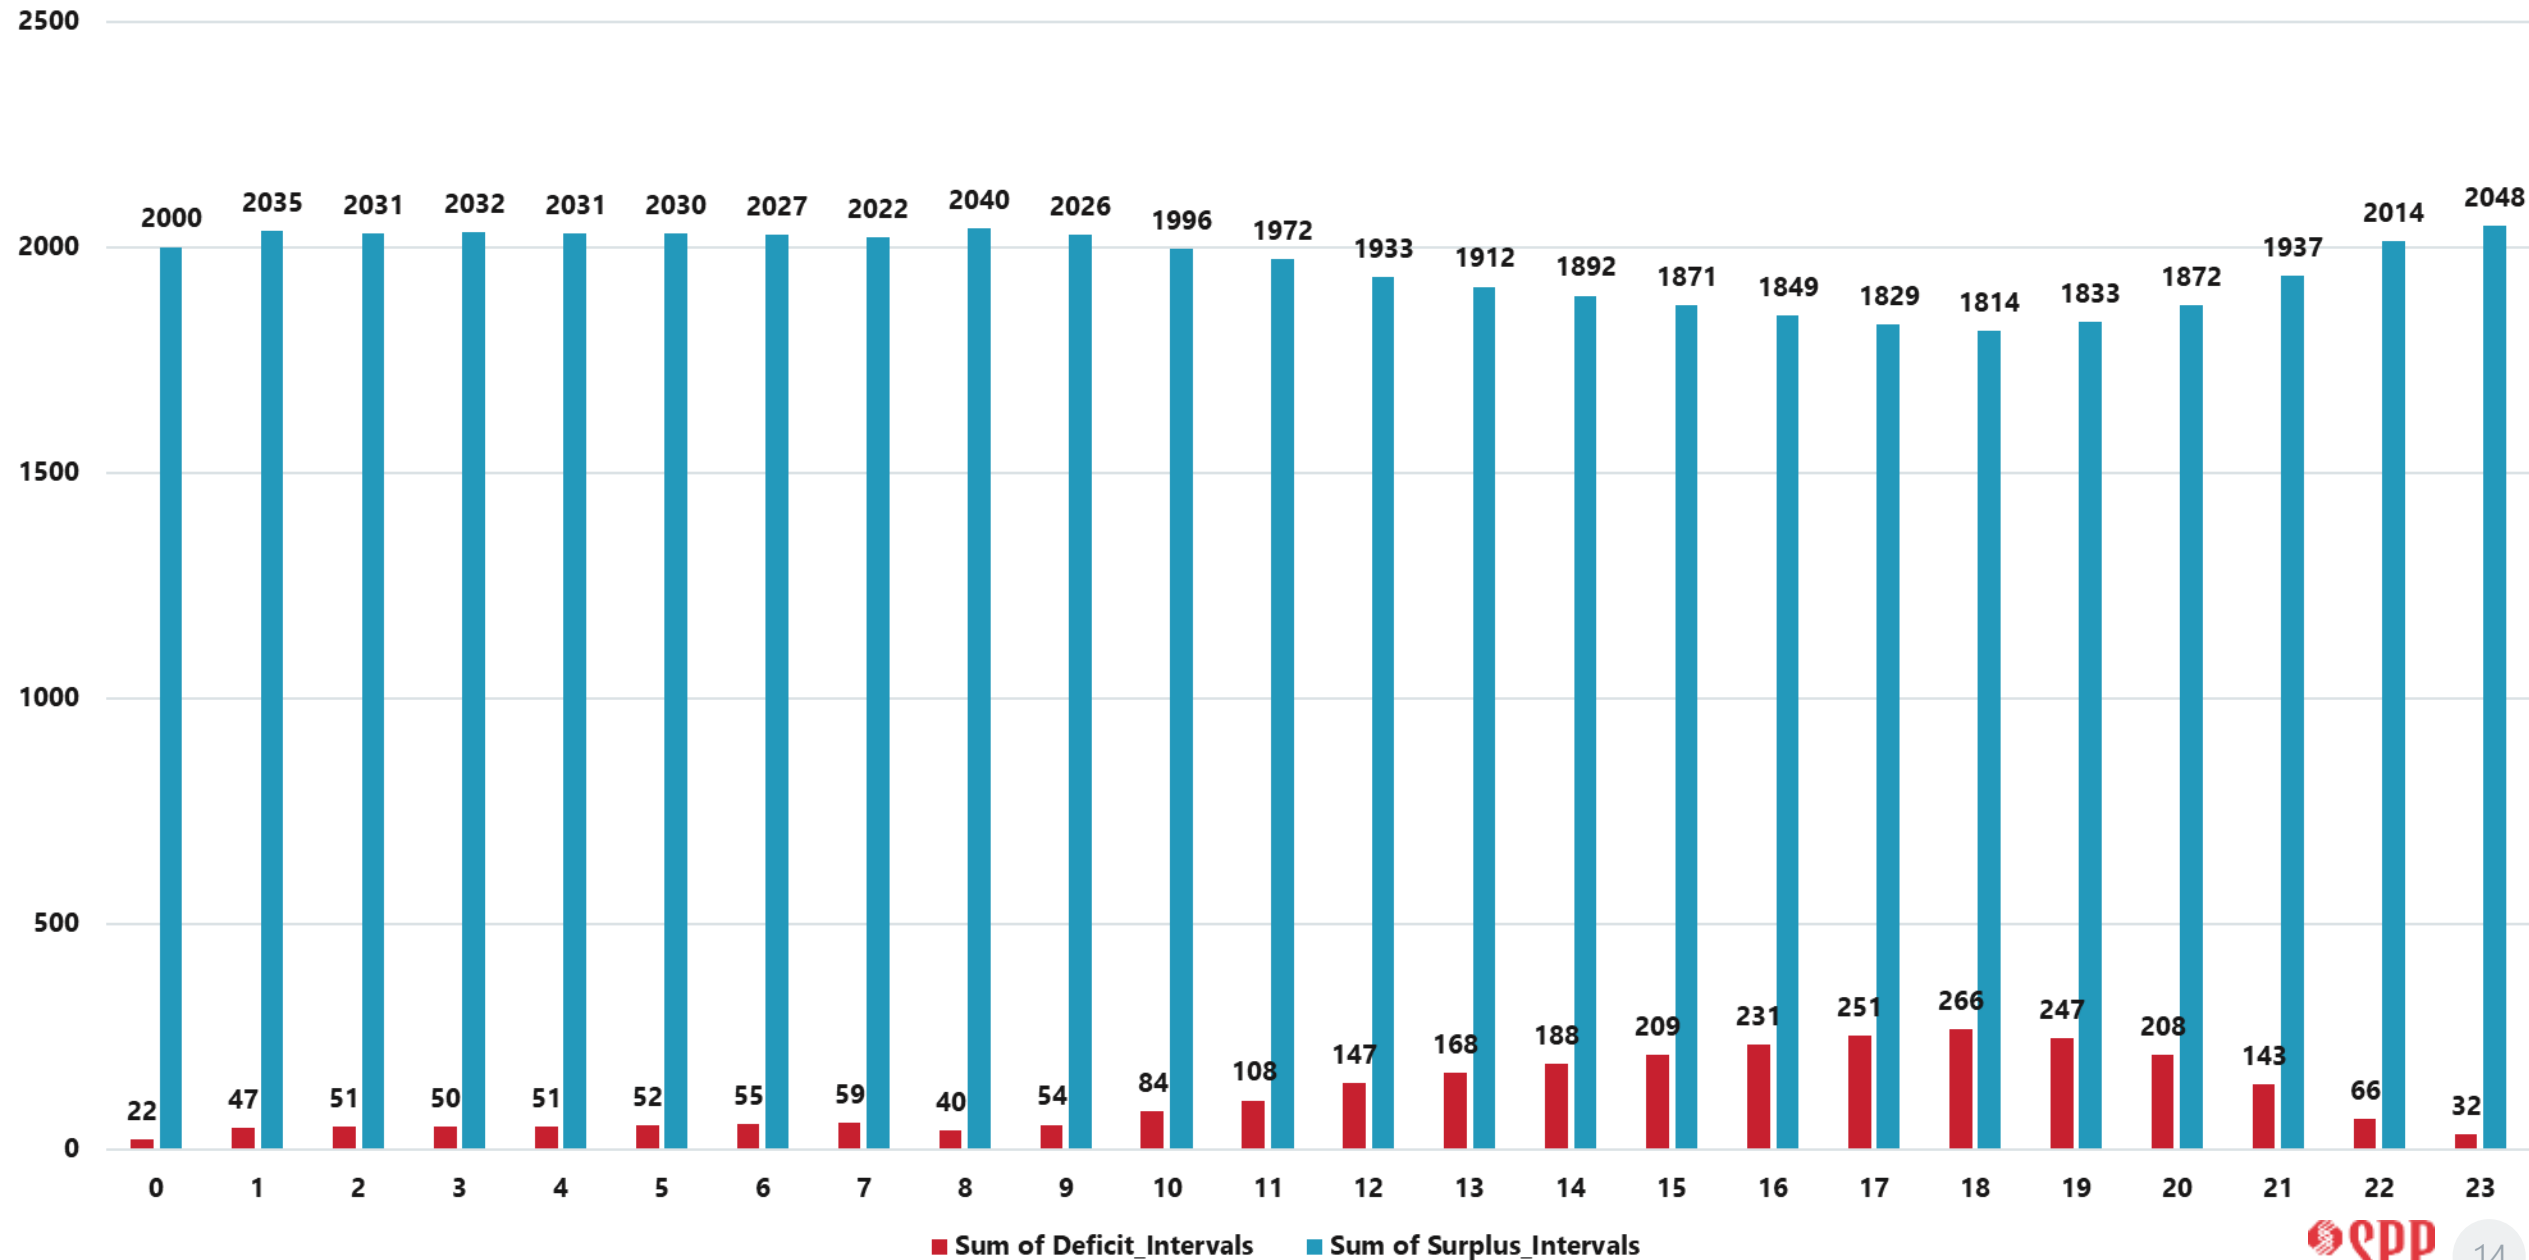

PERCENT OF EXPECTED FILES UPLOADED

- Measures the percent of files that were uploaded versus how much were expected
  - PSD Amounts
    - MD,VH,PL,PTPL: 1
  - Daily Amounts
    - OD: 24
- Only counted files that were uploaded successfully
- The cases with Participants uploading more than the required number of files for a day, we capped these submittals at the expected upload values

Percent of Required Files Uploaded
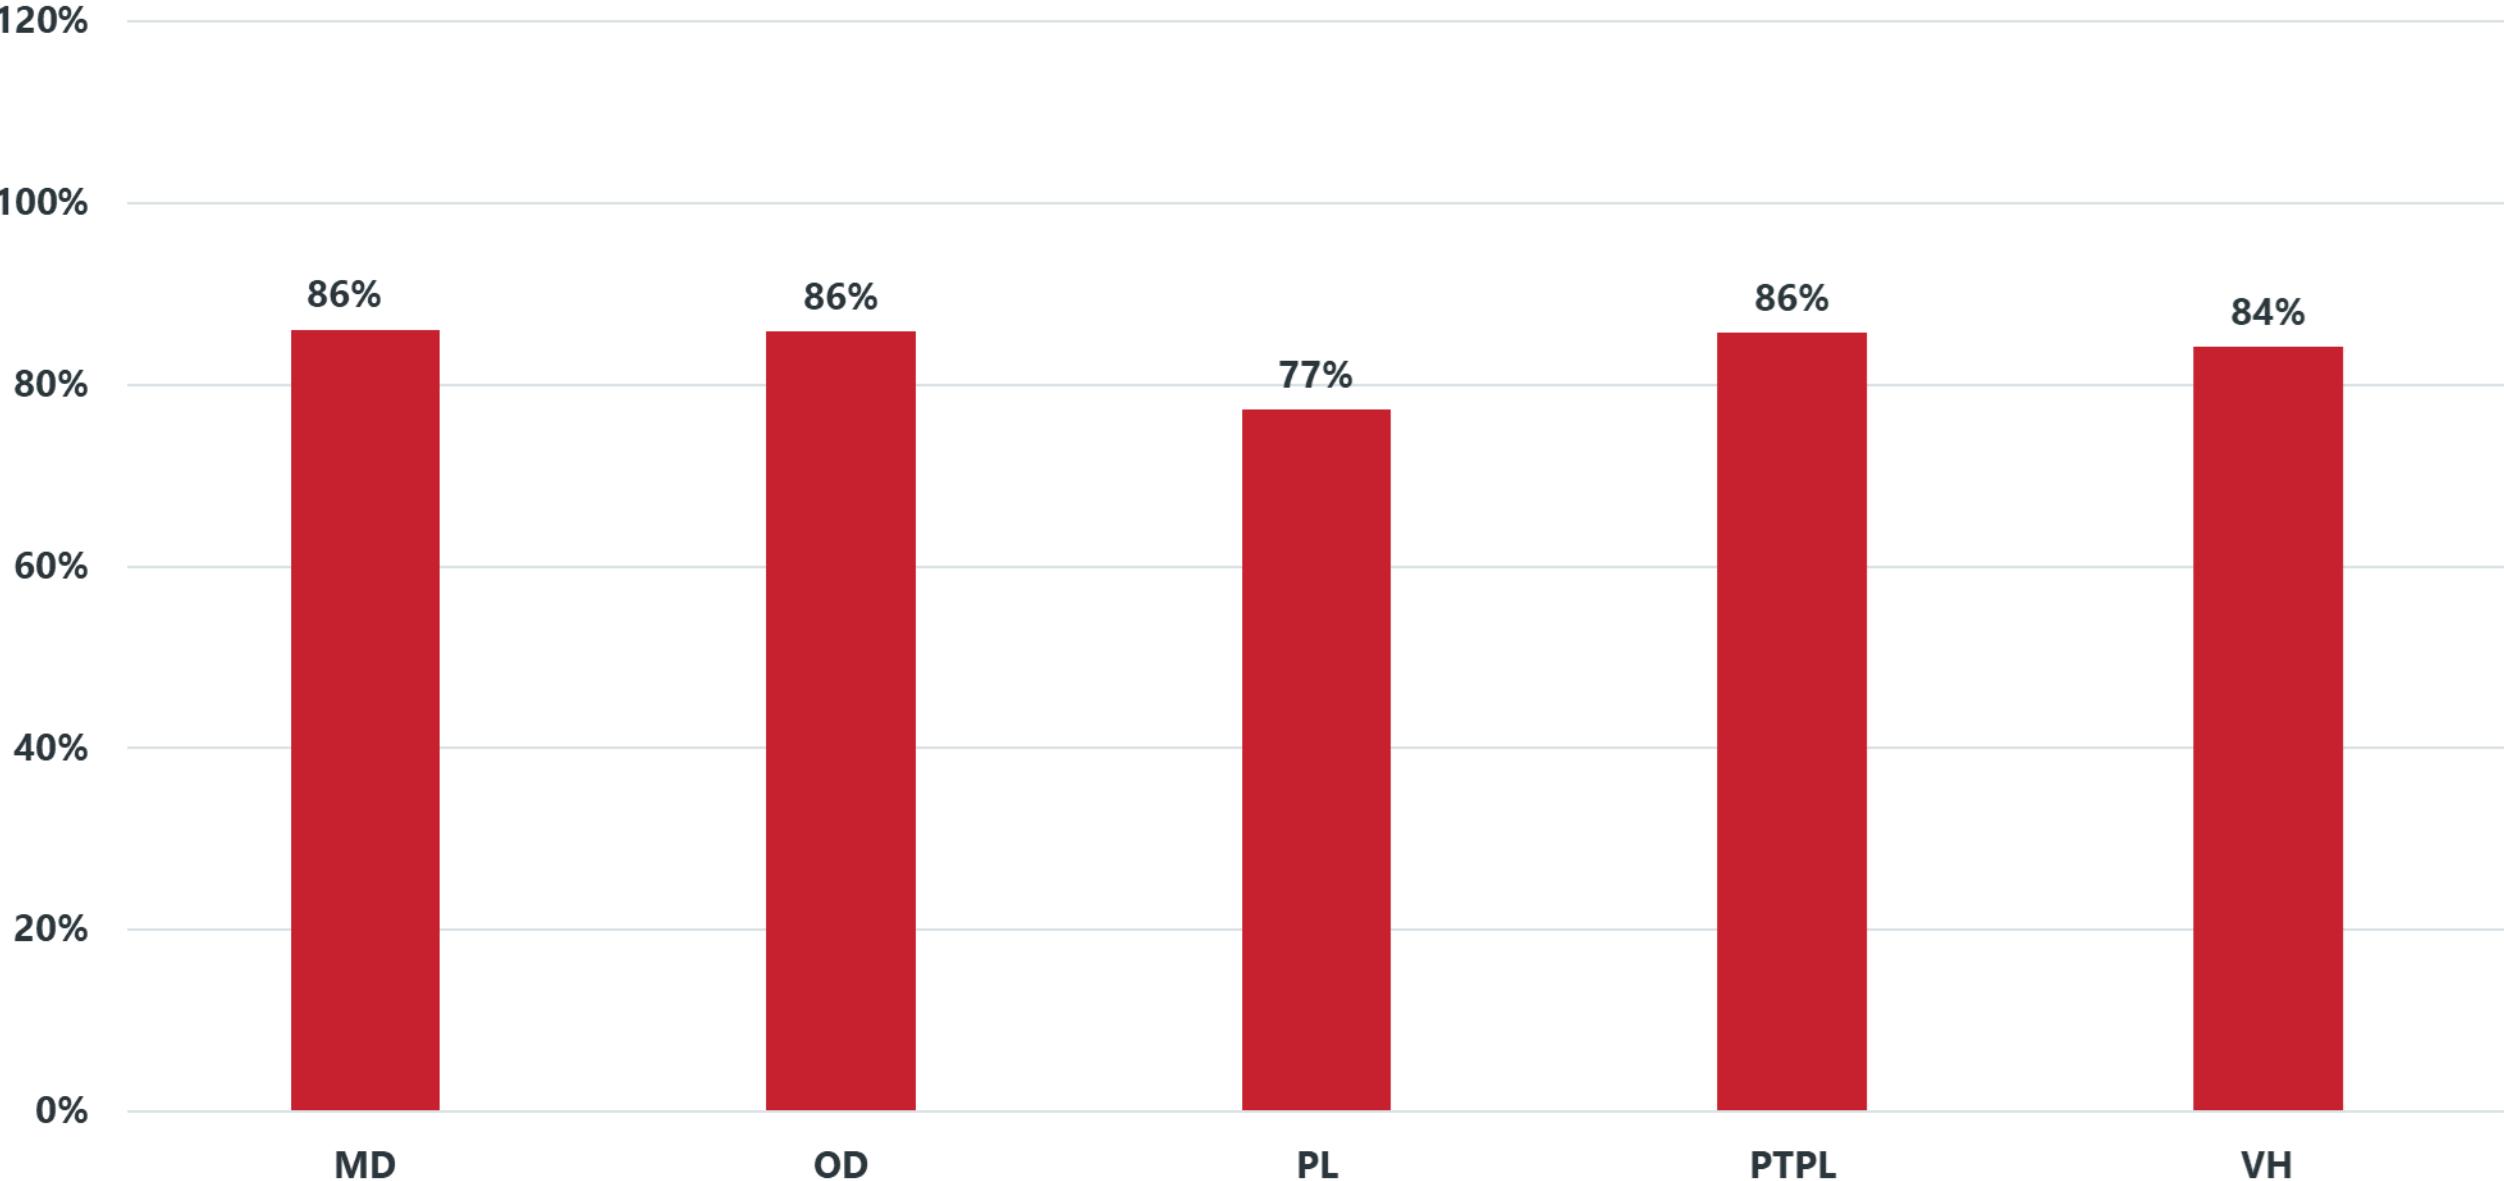

TAKE AWAYS

TAKE AWAYS

- Over the course of the season, we have seen improvement in all areas, participation, file uploads and data quality.

- There are still improvements to be made but we are confident through working In tandem with Participants we will make them.

- The biggest areas we can improve is getting Operating Day files submitted on time and submitting consistent and accurate actual data.
